Algebra and discrete mathematics

Contents

C. Abdioğlu, S. Şahinkaya, A. KÖR	Rigid, quasi-rigid and matrix rings with $(\bar{\sigma}, 0)$-multiplication	**1**
V. M. Bondarenko, A. A. Tylyshchak, M. V. Stoika	On the equivalence of matrices over commutative rings modulo ideals	**12**
N. Davis, M. Elder, L. Reeves	Non-contracting groups generated by (3,2)-automata	**20**
M. Gąsiorek, D. Simson, K. Zając	Algorithmic computation of principal posets using Maple and Python	**33**
Yu. I. Kulazhenko	Semiabelian and self-returning of points of n-ary groups	**70**
A. Paques, T. Tamusiunas	A Galois-Grothendieck-type correspondence for groupoid actions	**80**
I. Protasov, S. Slobodianiuk	On the subset combinatorics of G-spaces	**98**
A. Umar	Some combinatorial problems in the theory of partial transformation semigroups	**110**
V. Yegnanarayanan	Chromatic number of graphs with special distance sets, I	**135**

Algebra and discrete mathematics. Volume 17. Number 1. 2014

Algebra and discrete mathematics

Volume 17. Number 1. (Jan./Mar. **2014**)

Was founded in 2002. It is issued four times a year.

Founder

Lugansk Taras Shevchenko
National University

Publishers

Kyiv Taras Shevchenko
National University

Institute of Applied Mathematics
and Mechanics of the
National Academy
of Sciences of Ukraine

Lugansk Taras Shevchenko
National University

**Registered by the State
Committee of information policy,
broadcasting activities of Ukraine**

Registration Certificate
**КВ № 14443-3414ПР
dated 14.08.2008**

The papers published in Algebra and Discrete Mathematics are reviewed
in *Mathematical Reviews* and *Zentralblatt für Mathematik*

Algebra and Discrete Mathematics
has been indexed by *Scopus* since 2012

The aim of the journal **"Algebra and Discrete Mathematics"** (as $\mathcal{ADM}$ below) is to present timely the state-of-the-art accounts on modern research in all areas of algebra (general algebra, semigroups, groups, rings and modules, linear algebra, algebraic geometry, universal algebras, homological algebra etc.) and discrete mathematics (combinatorial analysis, graphs theory, mathematical logic, theory of automata, coding theory, cryptography etc.)

Languages:

Papers to be considered for publication in the $\mathcal{ADM}$ journal must be written in English.

Preparing papers:

Papers submitted to the $\mathcal{ADM}$ journal should be prepared in LaTeX. Authors are strongly encourages to prepare their papers using the $\mathcal{ADM}$ author package containing template, instructions, and $\mathcal{ADM}$ journal document class. $\mathcal{ADM}$ author package is available from the journal web-site `http://adm.luguniv.edu.ua`.

Graphical items should be prepared as eps (encapsulated PostScript) files and included by using the `graphicx` package. To avoid distortion from rescaling, figures must not be wider than 120 mm.

Submitting papers:

Authors who wish to submit their papers should send paper in PDF format directly to anyone of the Editors via electronic mail. E-mails of the Editors are listed on the Editorial Board page.

The source TeX-file of the paper will be needed if it accepted for publication.

Submission of a manuscript implies that the work described has not been published before and that it is not under consideration for publication elsewhere.

Required information:

The following information is required with the submission (note that all contact information, particularly email addresses, must be supplied to avoid delay):

1) *full postal address of each author;*
2) *e-mail of each author;*
3) *abstract (no more than 15 lines);*
4) *2010 Mathematics subject classification (can be accessible from* `http://www.ams.org/msc`*);*
5) *key words and phrases.*

Proof-sheets:

Authors receive only one set of proof-sheets in PDF format via e-mail for corrections. Only correction of misprints and minor changes can be made during proofreading.
