

CONTENTS

Editorial board		A
Instructions for authors		B
* * *		
A. K. Bhuniya, M. Kumbhakar	On the le -semigroups whose semigroup of bi-ideal elements is a normal band	171
P. Danchev	On strongly almost m - ω_1 - $p^{\omega+n}$ -projective abelian p -groups	182
M. Goncharov	On solvable Z_3 -graded alternative algebras	203
M. Jardim, D. M. Prata	Vector bundles on projective varieties and representations of quivers	217
L. Jones, D. White	A group-theoretic approach to covering systems	250
R. Kawaguchi	The lower bound for the volume of a three-dimensional convex polytope	263
M. Maloid-Glebova	Cyclic left and torsion-theoretic spectra of modules and their relations	286
M. A. Ollis	Constructing R-sequencings and terraces for groups of even order	297
O. Romaniv, A. Sagan	Quasi-Euclidean duo rings with elementary reduction of matrices	317
O. Pihura, B. Zabavsky	A morphic ring of neat range one	325
Yu. V. Zhuchok	Free abelian dimonoids	330
