

Volume 21
 Number 2
 Apr./Jun. 2016

ISSN: 1726-3255

*Algebra
 and discrete
 mathematics*

Contents

S. Bardyla, O. Gutik	■ On a semitopological polycyclic monoid	163
O. Bezushchak, B. Oliynyk, V. Sushchansky	■ Representation of Steinitz's lattice in lattices of substructures of relational structures	184
A. Jaber	■ Generalization of primal superideals	202
A. Yousefian Darani, H. Mostafanasab	■ Generalizations of semicoprime preradicals	214
M. Gutierrez, S. B. Tondato	■ Extended star graphs	239
D. I. C. Mendes	■ Involution rings with unique minimal *-biideal	255
B. Pawlik	■ The action of Sylow 2-subgroups of symmetric groups on the set of bases and the problem of isomorphism of their Cayley graphs	264
I. V. Protasov, K. D. Protasova	■ The comb-like representations of cellular ordinal balleanes	282
R. Wisbauer	■ Weak Frobenius monads and Frobenius bimodules	287
Yu. V. Zhuchok	■ Automorphisms of the endomorphism semigroup of a free commutative g -dimonoid	309

Algebra and discrete mathematics

Volume 21. Number 2. (Apr./Jun. 2016)

Was founded in 2002. It is issued four times a year.

Founder

Lugansk Taras Shevchenko
National University

Publishers

Kyiv Taras Shevchenko
National University

Institute of Applied Mathematics
and Mechanics of the
National Academy
of Sciences of Ukraine

Lugansk Taras Shevchenko
National University

**Registered by the State
Committee of information policy,
broadcasting activities of Ukraine**

**Registration Certificate
KB № 14443-3414ПП
dated 14.08.2008**

The papers published in Algebra and Discrete Mathematics are reviewed
in *Mathematical Reviews* and *Zentralblatt für Mathematik*

Algebra and Discrete Mathematics
has been indexed by *Scopus* since 2012

The aim of the journal “**Algebra and Discrete Mathematics**” (as *ADM* below) is to present timely the state-of-the-art accounts on modern research in all areas of algebra (general algebra, semigroups, groups, rings and modules, linear algebra, algebraic geometry, universal algebras, homological algebra etc.) and discrete mathematics (combinatorial analysis, graphs theory, mathematical logic, theory of automata, coding theory, cryptography etc.)

Languages:

Papers to be considered for publication in the *ADM* journal must be written in English.

Preparing papers:

Papers submitted to the *ADM* journal should be prepared in L^AT_EX. Authors are strongly encouraged to prepare their papers using the *ADM* author package containing template, instructions, and *ADM* journal document class. *ADM* author package is available from the journal web-site <http://adm.luguniv.edu.ua>.

Graphical items should be prepared as eps (encapsulated PostScript) files and included by using the `graphicx` package. To avoid distortion from rescaling, figures must not be wider than 120 mm.

Submitting papers:

Authors who wish to submit their papers should use the submission system at our web-site <http://admjournal.luguniv.edu.ua/>. Please attach the source TeX-file of the paper as the main file and the PDF as a supplementary file during the submission.

Submission of a manuscript implies that the work described has not been published before and that it is not under consideration for publication elsewhere.

Required information:

The following information is required with the submission (note that all contact information, particularly email addresses, must be supplied to avoid delay):

- 1) *full postal address of each author;*
- 2) *e-mail of each author;*
- 3) *abstract (no more than 15 lines);*
- 4) *2010 Mathematics subject classification*
(can be accessible from <http://www.ams.org/msc>);
- 5) *key words and phrases.*

Proof-sheets:

Authors receive only one set of proof-sheets in PDF format via e-mail for corrections. Only correction of misprints and minor changes can be made during proofreading.
