

Contents

317-324 Deformation state of short-period AlGaIn/GaN superlattices at different well-barrier thickness ratios

V.P. Kladko, N.V. Safriuk, H.V. Stanchu, A.V. Kuchuk, V.P. Melnyk, A.S. Oberemok, S.B. Kriviy, Z.V. Maksymenko, A.E. Belyaev, B.S. Yavich

325-330 Carrier transport mechanisms in InSb diffusion p-n junctions

A. Sukach, V. Tetyorkin, A. Voroschenko, A. Tkachuk, M. Kravetskii, I. Lucyshyn

331-335 Photoconductivity mechanism in structures with Ge-nanoclusters grown on Si(100) surface

Ye.Ye. Melnichuk, Yu.V. Hyrka, S.V. Kondratenko, Yu.N. Kozyrev, V.S. Lysenko

336-340 Nickel-induced enhancement of photoluminescence in nc-Si-SiO_x nanostructures

K.V. Michailovska, I.Z. Indutnyi, P.E. Shepeliavii, V.A. Dan'ko

341-345 Photoluminescence of As₂S₃ doped with Cr and Yb

A.V. Stronski, O.P. Paiuk, V.V. Strelchuk, Iu.M. Nasieka, M. Vlček

346-348 Hybrid-integrated version of SBD amplitude detector intended for the 400–600 GHz frequency range

A.V. Zorenko, A.V. Bychok, V.V. Shynkarenko, Ya.Ya. Kudryk, V.S. Slipokurov

349-352 Influence of absorption saturation on the shape of CdSe absorption edge

M.R. Kulish, M.I. Malysh, G.L. Isaenko, V.M. Litvinova

353-357 Structural and optical properties of Zn_{1-x}Co_xO thin films prepared by RF reactive sputtering technique

A.I. Savchuk, I.D. Stolyarchuk, I. Stefaniuk, B. Cieniek, E. Sheregii

358-367 Nanoscale tin dioxide films and zinc oxide hierarchical nanostructures for gas sensing applications

N. P. Klochko, K.S. Klepikova, G.S. Khrypunov, O.V. Pirohov, V.A. Novikov

368-373 Visualization of submicron Si-rods by SPR-enhanced total internal reflection microscopy

O.V. Rengevych, G.V. Beketov, Yu.V. Ushenin

374-379 Luminescent properties of fine-dispersed ZnS:Cu prepared using self-propagating high-temperature synthesis

Yu.Yu. Bacherikov, S.E. Zelensky, A.G. Zhuk, N.A. Semenenko, O.S. Krylova

380-383 Peculiarity of phase transformations in SiC crystals and thin films with in-grown original defects

S.I. Vlaskina, G.N. Mishinova, V.E. Rodionov, G.S. Svechnikov

384-388 Peculiarities of nonadditive changes in conductivity of nano-PDLC under influence of magnetite and single-wall carbon nanotubes

P. Kopčanský, M. Timko, Z. Mitrova, N. Tomašovičová, L. Tomčo, O.V. Kovalchuk, T.M. Kovalchuk, I.V. Oleinikova, A.I. Lad, I.P. Studenyak

389-393 High-speed optical recording in vitreous chalcogenide thin films

A.A. Kryuchyn, V.V. Petrov, V.M. Rubish, A.S. Lapchuk, S.O. Kostyukevych, P.E. Shepeliavii, K.V. Kostyukevych

394-397 Metrological aspects of researching the specific contact resistivity of ohmic contacts by using the four-contact method

V.N. Sheremet

398-402 Determination of the Schottky barrier height in diodes based on Au-TiB₂-n-SiC 6H from the current-voltage and capacitance-voltage characteristics

Ya.Ya. Kudryk, V.V. Shynkarenko, V.S. Slipokurov, R.I. Bigun, R.Ya. Kudryk

403-407 Propagation of privileged waves in longitudinally inhomogeneous medium with linear birefringence and dichroism

M.S. Koev, I.S. Kolomiets, S.N. Savenkov, Ye.A. Oberemok, Yu.A. Skoblya

408-411 Uncooled p(Pb_{1-x}Sn_xSe)-n(CdSe) heterostructure-based photodetector for the far infrared spectral range

Ya.I. Lepikh, I.A. Ivanchenko, L.M. Budiynskaya

412-415 Statistical structure of the biological tissue scattering of laser field with the complex degree of coherence

P.O. Angelsky

416-420 Magnetic and magnetoresistive characteristics of neutron-irradiated Si_{0.97}Ge_{0.03} whiskers

P.G. Litovchenko, N.T. Pavlovska, Yu.V. Pavlovskyy, Yu.O. Ugrin, G. Luka, I.P. Ostrovskyy

421-424 Studies on the optical fluxes attenuation process in optoelectronic systems

T.A. Strelkova

425-428 Electric conductivity studies of composites based on (Cu_{1-x}Ag_x)₆PS₅I superionic conductors

I.P. Studenyak, R.Yu. Buchuk, A.V. Bendak, O.O. Yamkovy, E. Kazakevicius, T. Šalkus, A. Kežionis, A.F. Orliukas
