

**CONTENTS
PART TWO**

M.M.POCIASK, E.M.SHEREGII, M.KUŹMA Creation of heterojunctions and periodical structures in solid solutions by laser annealing	201
YU.M.AZHNIUK, A.V.GOMONNAI, D.B.GOYER, I.G.MEGELA, V.V.LOPUSHANSKY Resonant interactions and disorder effects in CdS _{1-x} Se _x mixed crystals Raman spectra	208
V.S.BOKHINYUK, A.M.FRADKIN, A.I.GUTHY, I.V.KHIMSCH, A.G.OKUNEV, A.P.OSIPENKO, A.M.PARLAG The study of integrated cross-section excitation of isomeric states of nuclei in (γ, γ') reactions	212
B.M.HUNDA, V.M.MARUNCHAK, A.M.SOLOMON, I.I.TUROK, M.M.BORISYUK Thermostimulated luminescence in Tb-doped lithium tetraborate polycrystals	215
A.P.KALININ, D.YU.DUBROVITSKII, V.A.MOROZOV, I.D.RODIONOV, I.P.RODIONOVA On the possibility to determine repulsive potentials in eV region from fast molecular beam scattering experiments	218
M.I.KARBOVANETS, M.V.KHOMA, V.YU.LAZUR Asymptotic approach to the processes of two-electron capture at slow ion-atom collisions	222
V.F.KLEPIKOV, V.V.BRYUKHOVETSKY, R.I.KUZNETSOVA, V.P.POJDA, N.I.BAZALEEV, V.F.KIVSHYK, V.V.UVAROV Stimulating superplastic deformation of Al-Mg-Cu-Si-Mn-Zr alloy by preliminary pulsed electron beam irradiation	228
A.D.KONDORSKIY Role of close coupling effects in continuum for ionization problems	231
M.KOVAČIČ, J.HORÁČEK, K.NAJZAR Use of wavelets in potential scattering problems	235
GY.SH.KOVÁCS, I.P.STUDENYAK, V.V.PANKO, O.A.MYKAJLO, V.V.MITROVCIJ, A.G.OKUNYEV, A.M.FRADKIN Influence of β -radiation on optical absorption edge in Cu ₆ PS ₅ I crystals	239
S.S.KRAFCHIK, S.D.CHEPUR, B.M.HUNDA, P.P.PUGA, I.I.TUROK, A.M.SOLOMON Thermographic and X-ray phase studies of undoped and doped lithium tetraborate	243
A.A.BOROVIK, V.N.KRASILINEC Post-collision interaction effects in electron impact excitation of autoionizing states in lithium	247

YU.G.CHERNYAKOVA, I.I.SHUMLYANSKY	251
Relativistic perturbation theory calculation of the Na-like spectra satellites of 2-3 Ne-like ion transitions	
V.YU.LAZUR, OX.REITY	255
WKB-method in the two-center problem for the Dirac equation	
V.YU.LOJA, A.V.LADA, B.M.HUNDA, I.I.TUROK, A.M.SOLOMON, S.S.KRAFCHIK, YU.I.SEMAK	261
Production of zinc sulphide- and sodium fluoride-doped lithium tetraborate and studies of its properties	
R.T.MARIYCHUK, P.P.POPOVICH, V.V.BUNDA, E.E.SEMRAD	264
Superconductivity at 100 K in Cd-Ba-Ca-Cu-O ceramics	
V.M.MAZUR, Z.M.BIGAN, T.Y.MARYNETS, YU.V.PYLYPCHENKO	267
Barium isotopes as the objects for studying the isomer ratios	
V.I.KELEMEN	270
On the bound state of $e^+ + Yb$ system	
I.I.SHAFRANYOSH, M.O.MARGITICH, LLSHIMON	273
Electron-impact ionization cross-sections of Sr atoms from ground- and metastable states	
V.N.POLISCHUK	276
Quasimolecular terms for "an inert gas atom - a rare-earth atom" system	
P.P.POPOVICH	279
Fluctuation effects in high-temperature superconductor oxides	
YU.PYLYPCHENKO, Z.BIGAN, I.KOBAL	283
Formation of nuclei isomeric states in the photofission reaction	
Y.LYKHACH, V.NEHASIL	286
Electron spectroscopy study of metal particle - gas molecule interaction	
B.V.ROBOUCH, R.HUS, J.POLIT, E.M.SHEREGII, E.ŚCIESINSKA, J.ŚCIESIŃSKI, A.KISIEL	290
Far infrared spectra of tetrahedral quaternary alloys	
I.I.SHAFRANYOSH, T.A.SNEGURSKAYA	294
Energy dependences of electron excitation cross sections for low-energy Mg, Ca and Sr atom levels out of the metastable states	
I.V.SHEVERA, A.K.SHUAIBOV, L.L.SHIMON, A.I.DASHCHENKO, A.I.MINJA	297
Investigation of the work conditions and characteristics of multiwave emitters on chlorides and fluorides of rare gases	
V.S.VUKSTICH, N.M.ERDEVYD, J.E.KONTROS, I.V.CHERNYSHOVA, O.B.SHPENIK	302
Automated setup for studying the atomic systems excitation by ultramonoenergetic electrons	

A.ORBÁN, B.SULIK	305
The inclusion of the electronic screening potential in impact-parameter calculation	
S.V.AMBROSOV	308
Selective ionization of atoms and molecules by electric and light field. Autoionizing Rydberg resonances in heavy atoms	
H.V.VASILIEVA, V.V.STRELKO, A.P.OSYPENKO, V.S.KOUTS	313
Sorption investigation of fission fragments of uranium nuclei by titanium phosphate in water solution	
N.TSUD, D.BAČA, K.VELTRUSKÁ, V.MATOLÍN	316
Structural characterization of Pd thin film growth on Al ₂ O ₃ using photoelectron and ion spectroscopy	
A.V.GLUSHKOV, L.A.VITAVETSKAYA	321
Accurate QED perturbation theory calculation of the structure of heavy and superheavy element atoms and multicharged ions with the account of nuclear size effect and QED corrections	
B.SULIK, T.J.M.ZOUROS, A.ORBAN, L.GULYÁS	325
Transfer-loss process in 0.2- 2 MeV/u O ⁵⁺ + He collisions	
A.V.LOBODA, N.S.LOBODA, A.V.GLUSHKOV	328
Dynamics of interaction of atom with laser field. Photon echo and its use in the theory of neural networks	
O.I.ZATSARINNY, L.O.BANDURINA	332
R-matrix calculation of the electron-impact excitation of Zn ⁺ and Cd ⁺	
M.STETS, M.HOSHOVSKY, O.PARLAG, V.BUZASH, V.OKOGRIB	336
Activation analysis of electronic scrap samples elemental composition	
M.STETS, M.HOSHOVSKY, M.POTUSHNYAK	341
Gamma-spectrometry in identification of archaeological samples	
M.STETS, V.MASLYUK, O.PARLAG, V.BUZASH, V.OKOGRIB	345
Gamma-spectrometry of the samples from Muzhiyevo mine	
A.K.SHUAIBOV, L.L.SHIMON, A.J.DASHCHENKO, M.P.CHUCHMAN	348
Optical characteristics of erosion gallium, indium and copper laser plasma	
V.P.KOZLOVSKAYA	353
Rydberg states of diatomic molecules: ab initio perturbation theory calculation of alkali dimmers	
F.F.TELYCHKO	357
The interaction of the absorbed radiation with the microstructures of tissue	
I.V.KUKLINA, V.G.SHEVCHUK	361
H-like and He-like systems in a superstrong magnetic field: numeric calculation	

L.V.POPERENKO, M.V.VINNICHENKO, V.S.VOITSENYA Spectroellipsometric studies of D ⁺ ion irradiated W (110) and (111) single crystals	364
V.G.KRAVETS, A.V.PRYGUN, K.L.VINNICHENKO Electron-beam irradiation based recording on organic dye films	368
I.I.SHUMLYANSKY, V.G.SHEVCHUK, V.M.IGNATENKO, G.P.PREPELITSA Atom of hydrogen in a strong uniform electric field: modified operator perturbation theory method	372
A.V.GLUSHKOV, YU.A.KRUGLYAK, V.D.PARKHOMENKO, P.N.TSYBULEV, M.V.BELOUS Bound states in catalysis: new electro-dynamical and quantum chemical models in electron theory of catalysis	376
T.SZABO The $K^+ \rightarrow \pi^+ \nu \bar{\nu}$ decay	380
A.V.GLUSHKOV, S.V.MALINOVSKAYA Relativistic models in dynamics of interaction between electron shells of atoms and nucleons: new effects	383
S.V.MALINOVSKAYA S-matrix formalism in the calculation of oscillator strengths, radiation and autoionization widths for complex atoms and multicharged ions	387
A.V.GLUSHKOV, S.V.MALINOVSKAYA, S.V.FILATOV Consistent quantum-mechanical theory calculation of electron-positron pair production in heavy atomic nucleus collisions. Atomic parity nonconservation effect	391
A.V.GLUSHKOV, A.V.LOBODA, M.ZUDA Bound states in quarkonium and superatoms systems: energy levels splitting	394
