ЗМІСТ

CONTENTS

Динаміка та міцність машин

Dynamics and Strength of Machines

Martynenko V.G., Ulianov Yu.N. Modernization of an experimental installation and a procedure for investigating the anisotropic viscoelastic properties of composite materials at elevated temperatures3

Miroshnikov V.Yu. First basic elasticity theory problem in a half-space with several parallel round cylindrical cavities.....12

Tretiak O. V. Mathematical simulation of thermal condition of a brush contact device in three-dimensional setting.....19

Hasanov Sh. G. Modeling Crack Initiation in a Composite Under Bending25

Loveikin V. S., Pochka K. I., Romasevych Yu. O. Modeling Roller Forming Unit Dynamic Analysis with Energy Balanced Drive Dissipative Properties Taken into Account32

Прикладна математика

Applied Mathematics

Stoyan Y.G., Chugay A.M. Packing convex homothetic polytopes into a cuboid45

Sheludko G.A., Ugrimov S.V. Adaptive piecewise linear approximation of difficult-to-compute functions60

Abstracts and References68
