

До дев'яносторіччя з дня народження В.Г. Бар'яхтара

Відповідальні за випуск Б.О. Іванов та О.С. Ковальов

| | |
|--|------|
| Вступ | 895 |
| <i>Oleksandr Bakai and Mykhailo Bratchenko</i> Stochastic dynamics of a nonlinear oscillator driven by periodic force with slowly varying frequency | 899 |
| <i>М.Ю. Ковалевский, С.В. Пелетминский</i> Принцип остаточной симметрии вырожденных состояний равновесия и классификация параметров порядка одноподрешеточных магнетиков со спином $s = 3/2$ | 904 |
| <i>Victor A. L'vov, Anna Kosogor, and Volodymyr A. Chernenko</i> Theory of giant magnetocaloric effect in the shape memory alloy undergoing magnetostuctural phase transition | 909 |
| <i>Alexander L. Sukstanskii and Dmitriy A. Yablonskiy</i> Theoretical models of diffusion-attenuated magnetic resonance signal in biological tissue | 914 |
| <i>R.V. Verba, V.S. Tiberkevich, and A.N. Slavin</i> Dipole-dominated dissipative magnetic solitons in quasi-one-dimensional spin-torque oscillators | 920 |
| <i>Alexander V. Zolotaryuk and Yaroslav Zolotaryuk</i> Point interactions with bound states: A zero-thickness limit of a double-layer heterostructure | 927 |
| <i>D.S. Agafontsev and V.E. Zakharov</i> Growing of integrable turbulence | 934 |
| <i>М.М. Кулик, С.М. Рябченко, А.В. Боднарук</i> Магнитотранспортные свойства наногранулярных композитов с низкополевым положительным магнитосопротивлением | 940 |
| <i>A.K. Kolezhuk</i> Effective many-body interactions in one-dimensional dilute Bose gases | 947 |
| <i>S.V. Maleyev</i> Spin chirality and polarized neutrons | 951 |
| <i>Э.А. Пашицкий, В.И. Пентегов</i> О возможном подобии электрослабого и гравитационного взаимодействий | 954 |
| <i>V.M. Ishchuk and V.L. Sobolev</i> Solid solutions with coexisting ferroelectric and antiferroelectric phases for creation of new materials | 959 |
| <i>Д.М. Полищук, Т.И. Полек, В.Ю. Боринский, А.Ф. Кравец, А.И. Товстолыткин, А.Н. Погорельый, V. Korenivski</i> Диссипация тока спиновой накачки в тонкопленочном бислое ферромагнетик/антиферромагнетик | 963 |
| <i>V.N. Krivoruchko</i> Aharonov–Casher effect and electric field control of magnetization dynamics | 971 |
| <i>C.B. Tarasenko, В.Г. Шавров</i> Антиферромагнетик как управляемая однофазная упругая гиперболическая среда с пространственной дисперсией | 976 |
| <i>E.V. Tartakovskaya, A.S. Laurenson, and V.V. Kruglyak</i> Wannier–Stark ladder spectrum of Bloch oscillations of magneto-dipole spin waves in graded 1D magnonic crystals | 984 |
| <i>E.G. Petrov</i> Tunneling magnon flow across the terminated ferromagnetic chain | 991 |
| <i>Б.А. Иванов, Е.Г. Галкина, В.Е. Киреев, Н.Е. Кулагин, Р.В. Овчаров, Р.С. Химин</i> Нестационарное вынужденное движение доменных стенок в ферримагнетиках вблизи точки компенсации спина | 997 |
| <i>О.Ю. Горобец, Ю.И. Горобец</i> Топологические характеристики строительных блоков в доменной стенке антиферромагнетика со взаимодействием Дзялошинского–Мория | 1008 |
| <i>A.S. Kovalev, Y.E. Prilepskii, and K.A. Gradjushko</i> Dynamics of pair of coupled nonlinear systems. I. Magnetic systems | 1014 |
| <i>G.N. Kakazei, K.Y. Guslienko, R.V. Verba, J. Ding, X.M. Liu, and A.O. Adeyeye</i> Non-uniform along thickness spin excitations in magnetic vortex-state nanodots | 1021 |
| <i>Y.V. Skrypnyk and V.M. Loktev</i> On the theory of systems with substitutional non-Hermitian disorder | 1028 |

Low Temperature Physics/Fizika Nizkikh Temperatur

Volume 46, No. 8, 2020

Special Issue

August, 2020

To the 90th birthday of I.V. Bar'yakhtar

Guest Editors B.A. Ivanov and A.S. Kovalev

| | |
|--|------|
| Preface | 895 |
| <i>Oleksandr Bakai and Mykhailo Bratchenko</i> Stochastic dynamics of a nonlinear oscillator driven by periodic force with slowly varying frequency | 899 |
| <i>M.Y. Kovalevsky and S.V. Peletminsky</i> The principle of residual symmetry of degenerate equilibrium states and the classification of order parameters of single-sublattice spin $s = 3/2$ magnets | 904 |
| <i>Victor A. L'vov, Anna Kosogor, and Volodymyr A. Chernenko</i> Theory of giant magnetocaloric effect in the shape memory alloy undergoing magnetostuctural phase transition | 909 |
| <i>Alexander L. Sukstanskii and Dmitriy A. Yablonskiy</i> Theoretical models of diffusion-attenuated magnetic resonance signal in biological tissue | 914 |
| <i>R.V. Verba, V.S. Tiberkevich, and A.N. Slavin</i> Dipole-dominated dissipative magnetic solitons in quasi-one-dimensional spin-torque oscillators | 920 |
| <i>Alexander V. Zolotaryuk and Yaroslav Zolotaryuk</i> Point interactions with bound states: A zero-thickness limit of a double-layer heterostructure | 927 |
| <i>D.S. Agafontsev and V.E. Zakharov</i> Growing of integrable turbulence | 934 |
| <i>M.M. Kulik, S.M. Ryabchenko, and A.V. Bodnaruk</i> Magnetotransport properties of nanogranular composites with low field positive magnetoresistance | 940 |
| <i>A.K. Kolezhuk</i> Effective many-body interactions in one-dimensional dilute Bose gases | 947 |
| <i>S.V. Maleyev</i> Spin chirality and polarized neutrons | 951 |
| <i>E.A. Pashitskii and V.I. Pentegov</i> On the possible similarity of electroweak and gravitational interactions | 954 |
| <i>V.M. Ishchuk and V.L. Sobolev</i> Solid solutions with coexisting ferroelectric and antiferroelectric phases for creation of new materials | 959 |
| <i>D.M. Polishchuk, T.I. Polek, V.Yu. Borynskyi, A.F. Kravets, A.I. Tovstolytkin, A.M. Pogorily, and V. Korenivski</i> Spin-current dissipation in a thin-film bilayer ferromagnet/antiferromagnet | 963 |
| <i>V.N. Krivoruchko</i> Aharonov–Casher effect and electric field control of magnetization dynamics | 971 |
| <i>S.V. Tarasenko and V.G. Shavrov</i> Antiferromagnet as the tunable single-phase elastic hyperbolic medium with the spatial dispersion | 976 |
| <i>E.V. Tartakovskaya, A.S. Laurenson, and V.V. Kruglyak</i> Wannier–Stark ladder spectrum of Bloch oscillations of magneto-dipole spin waves in graded 1D magnonic crystals | 984 |
| <i>E.G. Petrov</i> Tunneling magnon flow across the terminated ferromagnetic chain | 991 |
| <i>B.A. Ivanov, E.G. Galkina, V.E. Kireev, N.E. Kulagin, R.V. Ovcharov, and R.S. Khymyn</i> Non-stationary forced motion of domain walls in ferrimagnets close to the spin compensation point | 997 |
| <i>O.Yu. Gorobets and Yu.I. Gorobets</i> Topological characteristics of building blocks in the domain wall of an antiferromagnet with Dzyaloshinskii–Moriya interaction | 1008 |
| <i>A.S. Kovalev, Y.E. Prilepskii, and K.A. Gradjushko</i> Dynamics of pair of coupled nonlinear systems. I. Magnetic systems | 1014 |
| <i>G.N. Kakazei, K.Y. Guslienko, R.V. Verba, J. Ding, X.M. Liu, and A.O. Adeyeye</i> Non-uniform along thickness spin excitations in magnetic vortex-state nanodots | 1021 |
| <i>Y.V. Skrypnyk and V.M. Loktev</i> On the theory of systems with substitutional non-Hermitian disorder | 1028 |
