

TECHNOLOGY AUDIT AND PRODUCTION RESERVES

№ 2/1(70), 2023

CONTENTS

MECHANICAL ENGINEERING TECHNOLOGY

- 6** Analysis of intensification of zeolite drying on a vibrating conveyor dryer with infrared emitters
Vitalii Kushniruk, Oleh Novokhat

MATERIALS SCIENCE

- 10** Determination of critical surface tension of wetting of textured water-repellent surfaces
Oleksiy Myronyuk
- 14** Research of orthotropic composites failure taking into account their structural stochasticity
Roman Kvit
- 19** Development of method for anti-icing materials consumption optimization during winter road maintenance
Anna Kharchenko, Anatolii Smirnov

ELECTRICAL ENGINEERING AND INDUSTRIAL ELECTRONICS

- 24** Higher order dispersions effect on high-order soliton interactions
Khadija Khelil, Azzeddine Dekhane, Aissa Benselhoub, Stefano Bellucci
- 30** Development of a method of analysis of energy and information characteristics of wireless networks of critical application under conditions of limitations on the signal/(interference plus noise) ratio
Serhii Vodopianov, Oksana Martynova, Arkadii Krainosvit

TECHNOLOGY AND SYSTEM OF POWER SUPPLY

- 35** Experience and prospects of innovative main roadways construction and maintenance technologies of new coal units of PJSC «Mine Management «Pokrovske»
Victor Levit, Viacheslav Kamenets, Denis Chebotenko
- 43** Abstracts and References
- 50** Анотації
