

CONTENTS

Double-clad thulium/ytterbium co-doped octagonal-shaped fibre for fibre laser applications <i>Babar I. M., Sabran M. B. S., Jusoh Z., Ahmad H., Harun S. W., Halder A., Paul M. C., Das S. and Bhadra S. K.</i>	173
Behavior of topological defects of optical indicatrix orientation in cubic single crystals under conically distributed electric field. 1. The electric field and the optical beam parallel to the three-fold symmetry axis <i>Vasylykiv Yu., Kryvyi T., Skab I. and Vlokh R.</i>	184
Preferable geometrical parameters of samples for piezooptic experiments <i>Kvasnyuk O., Vasylykiv Yu., Krupych O. and Vlokh R.</i>	195
Design of polarization-maintaining photonic crystal fibre for dispersion compensation over the E+S+C+L telecom bands <i>Md. Sharafat Ali, Ahmed N., Shahadat Hussain, Samiul Habib, Aljunid S. A. and Ahmad R. B.</i>	207
Determination of characteristics of anomalous light scattering in the gradient solutions using electronic speckle-pattern interferometry control of concentration distribution. <i>Bulavin L. A., Gotsulskiy V. Ya. and Popov A. Yu.</i>	216
Dot lasers: isotropic droplets in a cholesteric matrix, and vice versa. <i>Dudok T. H., Savaryn V. I., Fechan A. V., Cherpak V. V., Pansu B. and Nastishin Yu. A.</i>	227
