

CONTENTS

Acoustic anisotropy for acoustooptic NaBi(MoO ₄) ₂ crystals for acoustooptic NaBi(MoO ₄) ₂ crystals	69
<i>Martynyuk-Lototska I., Mys O., Kushnirevych M., Krupych O. and Vlokh R.</i>	
Acoustic anisotropy of AgGaGe ₃ Se ₈ crystals and their acoustooptic applications	77
<i>Martynyuk-Lototska I., Kushnirevych M., Myronchuk G. L., Parasyuk O. and Vlokh R.</i>	
An approach to achieve all-angle, polarization-insensitive and broad-band self-collimation in 2D square-lattice photonic crystals	85
<i>Noori M., Soroosh M. and Baghban H.</i>	
Electro-optic properties of exciplex-type organic electroluminescence devices depending on the technologies of active-layer preparation	95
<i>Ivaniuk K., Chapran M., Cherpak V., Barylo G., Stakhira P., Hotra Z., Hladun M. and Dudok T.</i>	
Nonlinear optical parameters of borate glasses with Ag nanoparticles formed using reducing Gd ³⁺ ions	103
<i>Dutka R. M., Adamiv V. T., Burak Ya. V., Gamernyk R. V. and Teslyuk I. M.</i>
