## Content

### MATERIALS SCIENCE

- 6 Identification of the influence of micro two-stage refilled friction stir spot welding with variation dwell time on dissimilar brass CuZn30-aluminum AA1100  
**Pathya Rupajati, Ario Sunar Baskoro, Latitia Dhayita Pramudito, Laksita Aji Safitri, Mohammad Azwar Amat, Gandjar Kiswanto**
- 15 Identifying the influence of technological factors on the structure and properties of contact wire from secondary copper  
**Ruslan Petrovs'ky, Anatolii Verkhovliuk**
- 24 Determining the sequence of elimination of impurity ions from the surface of historical cold iron weapons  
**Yuliia Vovk, Volodymyr Indutnyi, Nina Merezhko, Kateryna Pirkovich, Valeria Dyshlova**
- 30 A research of the effect of an underwater electric explosion on the selectivity of destruction of quartz raw materials  
**Gulden Bulkairova, Bekbolat Nussupbekov, Madina Bolatbekova, Ayanbergen Khassenov, Ulan Nussupbekov, Dana Karabekova**
- 38 Strengthening of friction surfaces by using geomodifiers based on serpentines from the Dashukivka deposit  
**Svitlana Bodu, Vyacheslav Andrieiev, Anton Novoshytskyi**
- 48 Abstract and References
