The need for informational support of life-long education

Informational society requires a qualitatively new education and new ways of providing it. There is a need for targeted and comprehensive formation of informational culture of individual. This is possible with the implementation of special disciplines and advanced technologies in educational institutions of all levels and degrees. Ukrainian government is doing everything possible for the informatization of education, for use of information and communication technologies in education, promotes global informational and educational systems. Its main tasks are to create a proper modern training facilities industry that meet world standards of scientific and technological development of the educational system, and the formation of informational competence of educational process subjects.

Keywords: informational society, informational culture, education.
