

C O N T E N T S

<i>M. L. Bertotti, S. O. Dovgyi and D. Koroliouk</i> Dynamics of ternary statistical experiments with equilibrium state	3
<i>O. F. Kashpur and V. V. Khlobystov</i> Invariance and uniqueness of solutions to polynomial interpolation problems in Euclidean space	8
<i>L. S. Koriashkina and A. P. Cherevatenko</i> Continuous problems of optimal multiplex-partitioning of sets without constraints and solving methods	15
<i>O. V. Matysik</i> Regularization of ill-posed problems in Hilbert space by means of the implicit iteration process	33
<i>A. M. Nedashkovska</i> Generalization of the Khovanskii's method for solving matrix polynomial equations	42
<i>B. Ostudin, Ya. Garasym and A. Beshley</i> Special estimators for correcting some solutions of integral equations	50
<i>E. V. Semenova</i> Arithmetical complexity of modified fully discrete projection method for the periodic integral equations	60
<i>S. M. Shakhno</i> Combined Newton-Kurchatov method under the generalized Lipschitz conditions for the derivatives and divided differences	78
<i>S. G. Solodky and E. V. Semenova</i> About minimal informational efforts by solving exponentially ill-posed problems	90
<i>H. P. Yarmola</i> Difference methods for solving inverse eigenvalue problem	101
