

CONTENTS

- 1 Andrij Dzyubyk, Liudmyla Dzyubyk, Yaroslav Zinko, Oleh Dzhaliuk**
Technological features of restoration of rims of support rollers for tracked vehicles
- 12 Inna Vishtak, Valeriy Savulyak**
Comparative characteristics and selection of speed bearings
- 26 Ihor Vrublevskiy**
Increasing of vibratory conveying velocity by optimizing the normal vibration
- 36 Volodymyr Topilnytskyy, Volodymyr Vyshatytskyy**
Construction of a mathematical model of an unbalanced vibrating separator on a spring suspension
- 45 Viktor Kovalev, Galyna Klymenko, Yana Vasylchenko, Maksym Shapovalov, Andrey Manokhin**
Selection of a rational method for hardening carbide cutting tools for heavy engineering
- 57 Teodozii Myskiv**
Analysis of the drive of electric vehicles with its different configurations
- 66 Roman Protasov, Ľuboš Magdolen, Jan Danko, Olena Lanets, Borys Vorontsov**
Analysis of the influence of the displacement of the gear rack profile of the pair evolution gearing on the quality indicators of the transmission
- 75 Andrii Slipchuk, Roman Jakym, Michal Bembenek**
Study of durability in the connection “cone-tungsten carbide insert” for tension dependence
- 83 Volodymyr Tonkonogyi, Maryna Holofieieva, Oleksandr Levynskiy, Sergii Klimov, Predrag Dasic**
The dependence of thermal processes in non-metallic heterogeneous materials on mechanical vibration loads
