

## CONTENT

### BUILDING

M. O. Berezan, Y. S. Babak.

*Elastic-plastic analysis of the bearing capacity of antikarst reinforced concrete beam foundation.*

I. V. Kotz, N. P. Badiora.

*Experimental research of soil stabilization by cement pulse injection.*

### ENERGETICS AND ELECTRICAL ENGINEERING

O. S. Yandylskiy, A. A. Marchenko, V. S. Guliy.

*Modeling of wind turbine control system and optimization of regulator parameters.*

O. Y. Leschuk.

*Modernization of the fuel supply system for the internal combustion engine of a generator set.*

S. M. Peresada, V. M. Trandafilov.

*Substantiation of the structure of the observer, invariant to the variations of rotor resistance.*

O. B. Mokin, B. I. Mokin, O. D. Folushniak, V. A. Lobatiuk.

*Synthesis of the control law of optimal motion of the battery-driven vehicle on the section of horizontal highway.*

O. P. Ostapenko, O. V. Bakum.

*Economic efficiency of heat-pumping stations on the conditions of fuel and energy resources cost change and variable operation modes.*

N. V. Semeniuk.

*Structuring of power losses in electric energy grid, taking into account the interaction of different factors.*

### RESEARCH RESULTS APPLICATION

D. V. Bachurskiy, I. F. Chervoniy.

*Behaviour of titanium admixtures in electrolytes of magnesium electrolyzers.*

### INFORMATION TECHNOLOGIES AND COMPUTER ENGINEERING

S. D. Shtovba, A. A. Yakovenko.

*Prediction of software system development efforts using a fuzzy hybrid model.*

MACHINE-BUILDING AND TRANSPORT

V. G. Pisarenko, V. V. Savuliak, V. Y. Bylichkina.  
*Specimens for shear testing of sheet metal materials.*
